ANIKET MAHAJAN

FULL-STACK ENGINEER | FRONTEND & AI

India | +91-7710943083 | aniketmahajanwork@gmail.com | linkedin.com/in/aniket-mahajan-27844313a

PROFESSIONAL SUMMARY

Engineer with 4+ years of experience building consumer-facing products and improving engineering platforms at Pocket FM. Currently leading frontend architecture and delivery across four products, with ownership spanning technical direction, performance, developer experience, and team execution. Strong hands-on experience with React, Next.js, TypeScript, design systems, and AI-assisted developer tooling, including custom MCP development. Delivered measurable improvements in page performance, content operations, and UI development speed.

EXPERIENCE

Lead Frontend Engineer | Pocket FM

Apr 2026 - Present | Remote

- Lead frontend architecture across four consumer products - Pocket TV, Pocket FM, AI Blaze, and App Webview - using Next.js 16 and TypeScript.
- Lead and support a team of 6+ engineers, setting technical direction, reviewing architecture, mentoring developers, and establishing consistent engineering practices.
- Drive adoption of AI-assisted development workflows using Claude and custom MCP tooling to improve component discovery, debugging, and implementation workflows.
- Own frontend production health across products, using Datadog and Lighthouse to track application reliability, Core Web Vitals, and TTFB.
- Partner with product and design teams to plan technical work, resolve dependencies, and deliver product initiatives.

Senior Software Engineer | Pocket FM

Apr 2025 - Mar 2026 | Remote

- Designed shared frontend architecture across multiple consumer products, improving code reuse and reducing duplicated implementation across teams.
- Built a Payload CMS-based publishing platform that reduced engineering-dependent content requests by 60%, enabling non-technical teams to publish independently.
- Created a centralized design system with Radix UI and Tailwind CSS, plus a custom MCP server for AI-assisted component discovery; reduced UI development time by 30% across 3+ product pods.
- Introduced Datadog and Lighthouse monitoring to track SEO, page performance, and TTFB and guide optimization work.
- Implemented Meta Pixel and Google Analytics 4 tracking, including custom conversion events, campaign attribution, and funnel monitoring.

Software Development Engineer | Pocket FM

Aug 2022 - Mar 2025 | Remote

- Improved web load times by 30-50% through asset optimization, lazy loading, and bundle analysis, validating changes with Lighthouse.
- Migrated the codebase from JavaScript to TypeScript, reducing reported bugs by 20% and improving maintainability.
- Rebuilt authentication using NextAuth with refresh-token support, removing the Firebase authentication dependency.
- Reworked payment integrations using updated APIs and a modular implementation, achieving over 90% transaction success with zero downtime during migration.
- Replaced Redux with Zustand and introduced React Query for data fetching, simplifying state management and reducing boilerplate.
- Raised test coverage from near zero to 65% across the codebase, with 95%+ coverage for new features using Jest, Cypress, and React Testing Library.
- Established GitHub Actions CI/CD workflows for automated checks, coverage reporting, and deployments.

EARLIER EXPERIENCE

Frontend Engineer Intern | Pocket FM

Mar 2022 - Jul 2022 | Remote

Shipped production features and performance fixes with product managers and designers, contributing to responsive web experiences and reusable components.

Software Engineer Intern | Monotype Solutions India

Oct 2021 - Jan 2022 | Noida

Built and optimized internal web tools for business teams, focusing on application performance and maintainable frontend implementations.

Software Engineer Intern | Khainar Technologies

Nov 2018 - Apr 2019 | Pune

Contributed to the StudyDuniya web application across frontend development and backend integration.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React, Next.js, Tailwind CSS, Radix UI, shadcn/ui

State & Data: Zustand, Redux, React Query, REST API integration

AI & Developer Tooling: Claude, MCP server development, AI-assisted development, component discovery

CMS & Authentication: Payload CMS, Sanity, NextAuth

Testing: Jest, Cypress, React Testing Library

Performance & Monitoring: Core Web Vitals, Lighthouse, Datadog, Sentry, performance optimization

DevOps & Infrastructure: GitHub Actions, AWS, Cloudflare, CI/CD

Other: Shaka DRM, SEO, design systems, system design, technical mentorship

EDUCATION

Master of Computer Applications (MCA) | Savitribai Phule Pune University

2019 - 2022 | Specialization: Mobile & Application Development

ADDITIONAL INFORMATION

Location: India **Notice period:** 30-45 days **Work preference:** Open to international opportunities
